

Good Afternoon!

I am seeking several GIS candidates for a very large upcoming project with the State of North Carolina.

I am looking for 2 ArcGIS/ESRI Programmer Analysts with C# experience. I have one position asking for 2-3 years of experience and one of them with 5-7 years of experience.

I am also looking for 2 ArcSDE DBAs who have experience in large Enterprise environments and also have Oracle DB skills and have used SQL applied to geodatabases. One of these DBA roles is a senior position and one is a lead position and the person there must have had lead experience.

Do you happen to know anyone who might be a good fit?

Kind Regards,

Vicki
