

ArcGIS Server, flex apps (VIPER, etc.) and other widgets

Good Morning All

As more and more of us are starting to work with ArcGIS Server, flex apps (VIPER, etc.) and other widgets, we are finding that many of us are using the same tools. We are also finding that many of us are trying to discover data feeds, etc. that would be of benefit to us in SC. In order to minimize duplication of effort in the searching and learning process, Gloria Forthun from EMD has set up a Yahoo Group that anyone (state, local, or others with interest) can participate in. The purpose is to help share ideas, links/data pertinent GIS web apps, widgets we modify/develop, etc. We hope that this will cut down on searching across the web and other forums. We believe this will help save time.

IF YOU ARE IN CHARGE OF A GIS USER GROUP - please forward this email to others within your user group so they can also participate.

PLEASE FEEL FREE to forward this to one and all - if any of you think that someone can benefit from participation in this group, please share this with them.

THIS CAN WORK - forums are a great way to communicate, but you must help contribute, post content, links, ideas, widgets, etc. The forum is a community and we must participate regularly to make it happen.

WHAT WE NEED - links to ArcGIS services, WMS services, etc., XML data feeds, web cams, etc. It doesn't need to be YOUR link or YOUR data - you can greatly help out by making us aware of links, data, solutions, etc. that you have stumbled across.

HOW - go to Yahoo.com and click on Groups. If you are not already signed up for Yahoo, you will need to do this (quick/easy). Sign up for the GISandFlexApps group. You can even set it up so messages are sent to your normal email account. If you need help with any of this, please contact either Gloria or I and we will be glad to assist.

I've already posted some content out there to get us started. Please help us all by getting involved. It won't take much time, and it can save you and others ALOT of time.

Thank you,

Tim De Troye
