## SCARC 2018 GIS Conference Exhibitors

 **Bradshaw Consulting Services** (www.bcs-gis.com) BCS is more than just innovative solutions. We understand the commitment and dedication that is required to be successful in public safety. We create solutions by partnering with agencies that are seeking to leverage technology and strategies to improve their operational performance in the field. From high performance solutions designed to help improve the delivery of time-critical services to managing non-emergency transportation in the most efficient way possible, BCS is focused on helping you achieve your desired results. Talk with us if you are serious about becoming more efficient and effective in your logistical operations.

 **CartoLab LLC** (www.cartolab.com) CartoLab is a geospatial consulting and application development firm located in Bluffton, South Carolina. We specialize in developing data-driven applications that help businesses and organizations of all sizes make better decisions. By tailoring solutions to fit our clients' needs, we are able to leverage a variety of software options that generate significant returns on investment.

 **Duncan-Parnell** (www.duncan-parnell.com) offers a wide selection of cutting-edge geospatial products and services that will deliver the highly accurate data you need to make the best decisions for your projects. Our geospatial surveying and mapping solutions are available in NC, SC, GA, VA, WV and Washington, D.C area.

 **EagleView**'s (www.eagleview.com) vision is to extract data from imagery using machine learning and AI and to provide that data to digitize manual workflows. EagleView provides access to its orthogonal and oblique Pictometry® aerial imagery, 3D models, and measurement and analytical tools through proprietary software as well as partner integrations. With a fleet of more than 120 aircraft at its disposal and a 60-petabyte data library with more than 400 million images, EagleView offers more coverage and third-party integrations than any other aerial imagery provider.

 **Eos Positioning Systems** (www.eos-gnss.com) designs and manufactures the world's premier, high-accuracy GNSS receivers for the BYOD (Bring Your Own Device) market. We offer extensive support for connecting our Bluetooth submeter, subfoot or RTK GPS / GNSS receivers to iOS, Android and Windows devices. Our free software utilities and SDK support for all mobile device operating systems allows you to smoothly integrate our GNSS receivers into your mobile GIS workflow.

 **Esri** (www.esri.com) Pioneering ArcGIS, the world's most powerful mapping and analytics software, we support organizations everywhere with the most powerful mapping and spatial analytics technology available. ArcGIS provides Esri users with a scientific-based approach to solving problems in real time.

 **Highland Mapping, Inc.** (www.highlandmapping.com) is a GIS consulting firm primarily serving county and municipal governments throughout North Carolina. We utilize GIS technology to help our clients increase productivity, enhance decision making, and provide better customer service.

 **HP** (www.hp.com) Our vision is to create technology that makes life better for everyone, everywhere — every person, every organization, and every community around the globe. This motivates us — inspires us — to do what we do. To make what we make. To invent, and to reinvent. To engineer experiences that amaze. We won't stop pushing ahead, because you won't stop pushing ahead. You're reinventing how you work. How you play. How you live. With our technology, you'll reinvent your world. This is our calling. This is a new HP.

 **Kucera International Inc.** (www.kucerainternational.com) a full-service provider of professional aerial and ground sensing/surveying, photogrammetric mapping, geospatial data processing, and related geomatic services for government, commercial/industrial, professional, institutional, and other applications. Kucera completes hundreds of projects annually throughout the United States and abroad covering areas ranging in size from a few acres to tens of thousands of square miles. A tailored approach supported by our extensive staff and technology resources is provided for each project to ensure the delivery of high-quality data in a timely and cost-effective fashion. In the State of South Carolina Kucera has performed aerial imaging, orthophoto mapping, and other types of base mapping for over 35 different counties, including numerous repeat surveys.
